VPN for Android (Employees)

A *virtual private network (VPN)* allows you to access the local network of the University of Stuttgart. Services offered by the University of Stuttgart that require a connection to the university network can be used withouth being physically on campus. You can estatblish a connection using the application *AnyConnect,* which can be downloaded from the *Google Play Store.* The installation and configuration of the application is described in this guide.
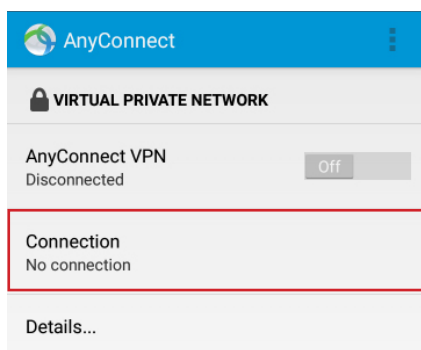

1. Downloading and Installating the App
Search for *AnyConnect* in the *Google Play Store* (Developer: *Cisco Systems, Inc.*) and install it.

AnyConnect
Cisco Systems, Inc.
USK: All ages

2. Add a Connection

2.1 Start the app and select „Connection". Press „Add New VPN Connection..." .

2.2 Enter a name as description.

2.3 The server adress is „vpn.tik.uni-stuttgart.de".

2.4 Leave the advanced preferences unchanged and confirm by pressing „Done".

3. Establishing a Connection

3.1 Flip the switch in the main menu.

Benutzername:
acXXXXXX@uni-stuttgart.de
Passwort:
· · · · · · · · · ·

3.2 Enter your credentials (ac123456@uni-stuttgart.de) and your password then confirm with „Connect".

3.3 The key symbol in the status bar indicates the succesful connection.

3.4 You can disconnect by flipping the switch again. Before you reconnect, select „Connection".

3.5 Activate „vpn.tik.uni-stuttgart.de" (Blue check mark)

State: June 2019
