

VPN for Windows 10/11 (students)

Virtual Private Network (VPN) gives you secure access to the local network of the University of Stuttgart. Services of the University of Stuttgart (e.g. access to your home directory) and external services available to students (e.g. SpringerLink) can be used from anywhere without restrictions. The connection is made with the Cisco Secure Client software, which can be downloaded from the <https://vpn.tik.uni-stuttgart.de>. The installation and configuration of the program is described in these instructions.

1. Download the setup file

Load the page <https://vpn.tik.uni-stuttgart.de/>

Note: Your device must be connected to the internet.

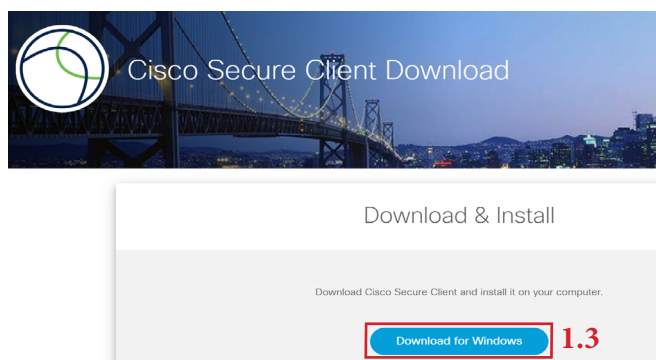

Technische Informations- und Kommunikationsdienste (TIK)

GROUP:

Username: 1.1

Password: 1.2

- 1.1 Enter your student e-mail address
(like st123456@stud.uni-stuttgart.de) with the corresponding password
- 1.2 Click on „Login“

- 1.3 Click on „Download für Windows“

- 1.4 The .exe file is saved in your download directory. Execute the file by double-clicking on it.
