

## Setting up eduroam iOS (English)

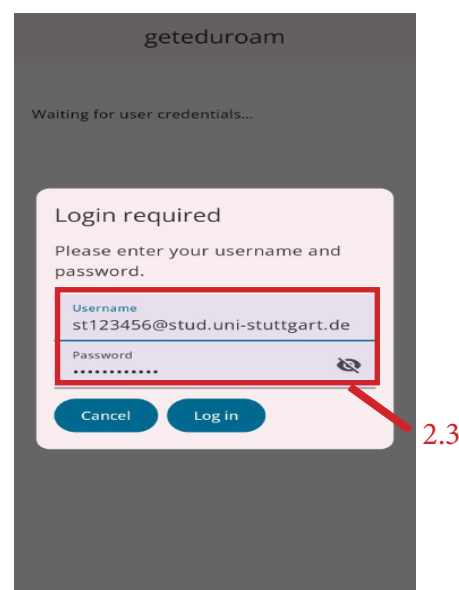

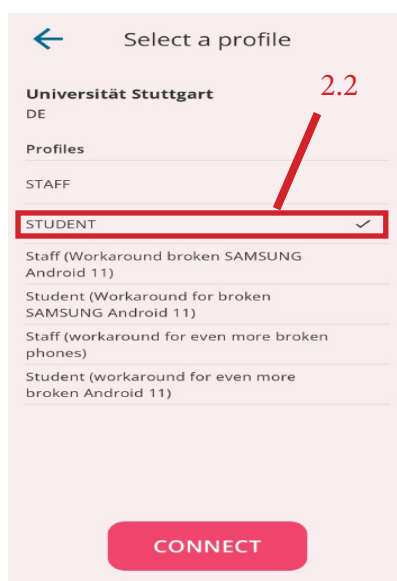

To correctly set up eduroam on an iOS device, the geteduroam app and a valid st-account are required. Additionally, it is important to ensure that there is no existing eduroam connection in the network settings.

### 1. Download

The geteduroam app must first be downloaded from the App Store. By tapping the cloud button when you already installed it one time or the load button, the

2. Open the app on your iOS device.
- 2.1 Search for „Universität Stuttgart“ under Institutes.
- 2.2 Select the role „Student.“
- 2.3 Fill in the username and password with the long version of your st-account and your student password.

3. After logging in, a message will appear indicating that eduroam has been successfully set up. You can then close the app and connect to eduroam under available Wi-Fi networks.

Stand: Mai 2024
