

Anleitung Windows-Defender

Instructions on how to scan your system for viruses with Windows Defender in Windows 10 & 11.

1. Open Scanner

1.1 Using the Windows search bar, search for "Windows Security" and open the app

Best	match		
•	Windows Security		
Settings			Windows Security
•	Windows Security	>	Арр
•	Windows Security settings	>	C? Open
Sea	rch the web		🖉 Pin to Start
Q	windows security - See more search results	>	 Pin to taskbar App settings
Q	windows security app	>	
Q	windows security settings	>	
Q	windows security center	>	
p	windows security scan	>	
Q	windows security button	>	
Q	windows security baseline	>	
Q	windows security alert	>	

1.2 Click on the tab "Virus & threat protection".

1.3 Check under "Virus & threat protection updates", if your security data is up to date

1.4 There's an option available to "check for updates". If your system is indeed up to date, continue with the next step.

Stand: November, 2023

	fo		
Quick scan 1.	de		
Checks folders in your system where threats are commonly found.			
			Full scan 2.
Checks all files and running programs on your hard disk. This scan could take longer than one hour.			
Custom scan			
Chance which files and lesstions you want to shack			
choose which hies and locations you want to check.			
O Microsoft Defender Antivirus (offline scan)			
Some malicious software can be particularly difficult to remove from			
your device. Microsoft Defender Antivirus (offline scan) can help find			
and remove them using up-to-date threat definitions. This will restart			

2.2 Should the scan find something on your system, proceed with the instructions provided by the program

3. Important!

3.1 Regardless of if the program found something or if an issue was resolved, please take a screenshot of the report which shows that your system is now disinfected. Then show the screenshot to one of the help desk workers.
